Durex Industries • Product Line

Advanced Ceramic Heaters

Silicone & Kapton Flexible Heaters

Process Heating Systems

Immersion Heaters

Plastic & Food Industry Sensors

Temperature Controllers

High Performance MI
Thermocouples & RTDs

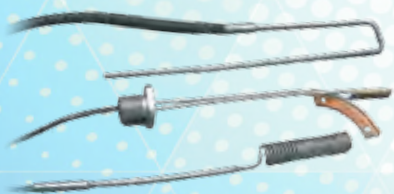

Tubular Heating Elements

Cast In Heaters

Semiconductor Heaters

Cable Heaters

Circulation Heaters

Duct Air & Tank Heaters

Cartridge Heaters

Precision RTDs & Thermistors

Durex is your clear choice for temperature and thermal solutions.

Our focus is to serve your needs and earn your confidence in us as a trusted development resource and supply chain partner. Helping our customers solve problems, overcome challenges and enable growth in their marketplace is what we are all about.

Let's create your COMPETITIVE ADVANTAGE for next-generation equipment – here's how:

- **“Can-Do” Culture.** With Durex’s “can-do” engineering culture, we’ll take on your toughest application challenges and provide effective solutions.
- **Deep In-House Capabilities.** Durex’s deep in-house technical capabilities coupled with vertically integrated manufacturing not found anywhere else in our industry.
- **Optimum Solutions.** Our wide breadth of product offerings along with decades of applications experience provide our customers with optimum solutions.
- **Fast Prototype Development** and quick turns will get product in your hands for testing, verification, and validation.
- **High-Level QC Systems** including first article compliance, PPAPs and volume production protocols to ensure reliable specification compliance.
- **Extensive Product Development Plus!** Our product development is consistently anchored by extensive testing capabilities for performance verification and validation.

We welcome the opportunity to demonstrate the Durex difference. Give us a call today!

About Durex Industries

Founded in 1980 by Ed Hinz, CEO & President, Durex Industries is a privately owned thermal solutions company specializing in electric heaters, temperature sensors, and temperature controls. Durex's 145,000 sq. ft. business, engineering, and manufacturing campus is conveniently located 25 miles northwest of Chicago in Cary, Illinois.

Since our founding, providing customers with reliable products and excellence in all aspects of the business have been the hallmark of Durex and the basis of our name. "Dur" means durable and "ex" means excellence. Durex Industries, an ISO 9001 registered company, supplies engineering and manufactures thermal solutions for most global industrial equipment markets, including food service, life sciences, packaging, photovoltaic, plastics, process, and semiconductor. Our focus on lean design, manufacturing, and business systems continues to provide customers with the best design and product value in our industry.
